## Council Corner

The main topic of discussion at last night's council meeting was the railroad crossing at Main Street. The crossing is the most hazardous one in the village because of the angle and blind spots. The state would require that crossing lights and gates be installed to maintain the crossing. The cost for the maintenance of this equipment would be the responsibility of the village. Since the village already has a crossing a short distance away, the council adopted a resolution to permanently close the crossing. Instead of the village paying to maintain the crossing, it would be compensated by the federal government to close the crossing. This money would have to be used for road improvements.

Plans are moving along on the reconstruction of Maybee-Scotfield road and the project should be started within the next 60 days. Also approved was the crack sealing of Bluebush Road and Raisin Street by an outside firm. Local streets will be handled by the village.

With Summer now here more and more children are playing at the park. For people that enjoy bringing their pets to the park, we ask that you please pick up after them. The village has also added more trash containers to the area to help eliminate the chance for broken glass and metal. The park is there for all to enjoy so we ask that you please co-operate and do your part.

**Enjoy the Summer if it ever stops raining.**
